Wives of Servicemen

Soon Will Sail Overseas

PARIS — Wives of officers and enlisted men who may remain in the army of occupation for a long time may soon receive permission to sail abroad and join their husbands. Gen. Dwight D. Eisenhower, who made the announcement, admitted he was very sympathetic toward the idea and would like his own wife to come over in a hurry.

"I'm just as bad off as any G.I. today," complained the general. "I don't want to be here. I'm 54 years old and I lead a kind of lonely life. It's hard, hell's fire, I know it's hard. That's why I keep my staff busy exploring shipping space for possible accommodations and the food situation. As soon as the problem of proper housing is licked all wives should be allowed to come over," he said.

From where I sit... by Joe Marsh

Only one side to our railroad tracks

Folks who are better off in our town live on the west side of the railroad tracks. We've got a lake there, and the local park, and some real nice land.

There used to be a phrase "from the wrong side of the tracks." It meant what you think, but you don't hear it any more. Not since Charlie Jenkins came home with the Purple Heart and Willie Wells got the Silver Star. There isn't any "wrong side" of the railroad tracks now.

And that change is going on all over America... where our

heroes have come from obscure homes... and great ones has overshadowed wealth and shal-low social definitions.

From where I sit, it all comes down to tolerance... tolerance for what a man is and does... tolerance for his freedom and opinions, whether he's rich or poor, likes beer or cider, Shakespear or the comic section. It's a great thing—tolerance!

Navy Gets Data Behind Jap Lines

Chinese Guerrillas Assist U. S. Force in Picking Up Information.

WASHINGTON — A daring United States navy force, guarded by Chinese guerrillas, operated behind Japanese lines in China during the war, regularly supplying weather and other intelligence to the fleet and army, says the Associated Press.

The navy drew back the curtains of secrecy on the combined Chinese-American group, known officially as SACO — Sino-American co-operation organization. Its code name was "Fried Fish."

The SACO began a few weeks after the Japanese attack on Pearl Harbor. The fleet had to have information on weather for the Japanese held Asia and western Pacific areas.
